## OM protein - protein search, using sw model

Run on: January 2, 2003, 12:39:57 ; Search time 21 Seconds

(without alignments)  
2238.559 Million cell updates/sec

Title: US-09-455-978b-2

Perfect score: 2394

Sequence: 1 MSNDNDLTVTADVNGIDGH.....ATDQVRTVEEVRVYKLS 489

Scoring table:

BLOSUM62  
Gapop 10.0 , Gapext 0.5

Searched: 283224 seqs, 96134422 residues

Total number of hits satisfying chosen parameters: 283224

Minimum DB seq length: 0  
Maximum DB seq length: 2000000000

Post-processing: Minimum Match 0%

Listing first 45 summaries

Database :

1: p1r1: \*  
2: p1r2: \*  
3: p1r3: \*  
4: p1r4: \*

Pred. No. is the number of results predicted by chance to have a  
score greater than or equal to the score of the result being printed,  
and is derived by analysis of the total score distribution.

## SUMMARIES

RT Genome sequence of Halobacterium species NRC-1.

RL Proc. Natl. Acad. Sci. U.S.A. 97:12176-12181(2000).

-1- FUNCTION: Heme-containing signal transducer responsible for

aerotaxis, the migratory response toward or away from oxygen (by

similarity).

-1- SUBUNIT: Homotrimer (Probable).

-1- SIMILARITY: BELONGS TO THE CHEMOTAXIS SENSORY TRANSDUCERS

FAMILY.

PT	Novel isolated bacterial heme binding protein, HemAT-Hs or HemAT-Bs which reversibly binds oxygen with low affinity, useful for controlled	

PT storage of oxygen and for sensing gaseous ligands such as oxygen  
XX Claim 6; Page 10; 94pp; English.  
XX  
CC The present invention relates to isolated archeal and bacterial haem  
CC binding protein, Hemat-Hs or Hemat-Bs which reversibly binds oxygen  
CC with low affinity. Haem binding protein is useful for controlled storage  
CC of oxygen by allowing haem binding protein to bind and store oxygen, and  
CC triggering the release of oxygen from haem binding protein by activating  
CC the signalling domain. Haem binding protein is useful for sensing gaseous  
CC ligands such as oxygen, NO, CO, or CN. Blood substitute comprising haem  
CC binding protein is useful for creating a patient suffering from low  
CC blood levels by administering and regulating the oxygen binding of the  
CC haem-binding protein by modifying the signalling domain. Haem binding  
CC protein is useful for haem-based catalysts, for artificial  
CC photosynthesis and for identifying potential signalling functions of  
CC mutated alpha-haemoglobin and myoglobin causing several diseases.  
CC The present sequence is Halobacterium salinarum Hemat-Hs protein which  
CC is salt tolerant.

CC Fluorescent apophytochrome-bilin conjugates, e.g. Cph2 (derived from
CC Synecocystis species) and phycoerythrobilin conjugate, useful as
CC fluorescent markers for biological research -
XX
PS Example 1; Page 48; 52pp; English.
```

XX The present invention is related to fluorescent apophytochrome-bilin  
CC conjugates, known as phytofluors. An apoprotein known as Cph2 from  
CC *Synechocystis* species is used as the apophytochrome and the bilin is  
CC preferably phycoerythrobilin. The phytofluors are useful as fluorescent  
CC markers for biological research. The phytofluors have a long wavelength  
CC absorption maximum, a high molar absorption coefficient and the  
CC recombinant apoproteins can spontaneously assemble with a variety of  
CC bilin chromophore precursors. The present sequence is a phytochrome  
CC related protein from *Synechocystis* sp.

 PT related polypeptides -  
 PT  
 XX  
 PS Claim 6; SEQ ID No 2614; 192pp; French.  
 XX  
 CC The present invention relates to the genome sequence of Listeria  
 CC monocytogenes EGD-e (see ABA03041). The genome sequence and fragments of  
 CC it are useful for selecting probes and primers for detecting genes in L.  
 CC monocytogenes and related organisms, and for studying genetic  
 CC polymorphisms and other genomes. The present sequence is a protein  
 CC encoded by the genome sequence of the present invention. Proteins  
 CC expressed from the genome sequence are useful for relating specific  
 CC antibodies, identification of L. monocytogenes and related organisms, and  
 CC for biosynthesis and biodegradation, especially biosynthesis of vitamin  
 CC B12. The genome sequence and proteins encoded by it are also useful for  
 CC selecting compounds that regulate gene expression and cell replication  
 CC and modulate L. monocytogenes-related diseases. In addition, the genome  
 CC sequence and proteins encoded by it are useful in pharmaceutical and  
 CC vaccines compositions for the treatment or prevention of infections by L.  
 CC monocytogenes and related organisms.  
 CC Note: The sequence data for this patent did not form part of the printed  
 CC specification, but was obtained in electronic format directly from WIPO  
 CC at [ftp.wipo.int/pub/published\\_pcl\\_sequences](http://ftp.wipo.int/pub/published_pcl_sequences).

 PS Disclosure; Pages 156-157; 165pp; English.  
 XX  
 CC Bordetella pertussis possesses a type III secretion system. Type III  
 CC secretion systems allow bacteria to target virulence factors directly at  
 CC host cells. The present sequence is a protein of B. pertussis. No name  
 CC has been specified for the present sequence. The coding sequence of the  
 CC present sequence is homologous to housekeeping genes of other species,  
 CC and so the present protein may have a role in cellular housekeeping. A  
 CC pathogenicity island is a compact, distinct genetic unit carrying  
 CC virulence genes. The coding sequence of the present sequence is located  
 CC within a pathogenicity island (see AAA64890) which also carries a  
 CC number of genes encoding proteins involved in the type III secretion  
 CC system of B. pertussis. See AAA64849-64884 and AAB14111-B1416 for  
 CC details of the coding sequences and proteins identified in the  
 CC pathogenicity island, of the present invention.

PT responsible for genetic disorders or other traits and to assess
PT biodiversity
```

```
XX
PS Claim 20; SEQ ID NO 54582; 103pp; English.
XX
CC The invention relates to isolated polynucleotide (I) and
CC polypeptide (II) sequences. (I) is useful as hybridisation probes,
CC polymerase chain reaction (PCR) primers, oligomers, and for chromosome
CC and gene mapping, and in recombinant production of (II). The
CC polynucleotides are also used in diagnostics as expressed sequence tags
CC for identifying expressed genes. (I) is useful in gene therapy techniques
CC to restore normal activity of (II) or to treat disease states involving
CC (II). (II) is useful for generating antibodies against it, detecting or
CC quantitating a polypeptide in tissue, as molecular weight markers and as
CC a food supplement. (II) and its binding partners are useful in medical
CC imaging of sites expressing (II). (I) and (II) are useful for treating
CC disorders involving aberrant protein expression or biological activity.
CC The polypeptide and polynucleotide sequences have applications in
CC diagnostics, forensics, gene mapping, identification of mutations
CC responsible for genetic disorders or other traits to assess biodiversity
CC and to produce other types of data and products dependent on DNA and
CC amino acid sequences. ABG00010-ABG3037 represent novel human
CC diagnostic amino acid sequences of the invention.
CC Note: The sequence data for this patent did not appear in the printed
CC specification, but was obtained in electronic format directly from WIPO
CC at ftp.wipo.int/pub/published_pcl_sequences.

 PT New isolated Helicobacter polynucleotides - used to develop products  
 PT for the diagnosis, prevention and treatment of Helicobacter  
 PT infections and gastrointestinal diseases  
 XX  
 PS Claim 8; Page 1743-1745; 2054pp; English.  
 XX  
 CC This sequence represents a Helicobacter pylori GHP0 protein of the  
 CC invention. The polypeptides can be used for preventing or treating  
 CC Helicobacter infections, and gastroduodenal diseases associated with  
 CC these infections, including acute, chronic, and atrophic gastritis, and  
 CC peptic ulcer diseases, e.g. gastric and duodenal ulcers. They can also be  
 CC used for the production of antibodies. The products can also be used for  
 CC detection and diagnosis.

 PT Helicobacter polynucleotide and polypeptide sequences - useful to  
 PT treat or prevent gastrointestinal infection  
 XX  
 PS Claim 1; Page 313-314; 362pp; English.  
 XX  
 CC This claimed Helicobacter pylori polypeptide, designated GHP0 1282,  
 CC can be used in vaccination methods for preventing or treating  
 CC Helicobacter infection. 85 Helicobacter polypeptides (see  
 CC AAM71474-W71558) are claimed, as well as isolated polynucleotides  
 CC (see AAV52009-93) that encode them. The invention also provides:  
 CC methods for producing these Helicobacter polypeptides in  
 CC recombinant host systems, and related expression cassettes, vectors  
 CC and transformed or transfected host cells; live vaccine vectors  
 CC that contain the polynucleotides of the invention and which can be  
 CC used to prevent or treat Helicobacter infection; therapeutic and/or  
 CC prophylactic methods involving administration of polynucleotide  
 CC molecules, polypeptides or monospecific antibodies; methods for  
 CC detecting the presence of Helicobacter in samples using e.g.  
 CC the polypeptides or monospecific antibodies; and methods for  
 CC purifying the polypeptides by antibody-based affinity  
 CC chromatography.

RESULT 14  
US-09-452-294-1  
; Sequence 1, Application US/09452294  
; Patent No. 6287790  
; GENERAL INFORMATION:

; APPLICANT: Lellievre, Sophie  
; APPLICANT: Bissell, Mina  
; TITLE OF INVENTION: UTILIZATION OF NUCLEAR STRUCTURAL PROTEINS FOR TARGETED  
; TITLE OF INVENTION: THERAPY AND DETECTION OF PROLIFERATIVE AND  
; TITLE OF INVENTION: DIFFERENTIATION DISORDERS  
; FILE REFERENCE: IB-1454- Sequence Submittal  
; Patent No. 6287790  
; CURRENT APPLICATION NUMBER: US/09/452,294  
; CURRENT FILING DATE: 1999-11-30  
; PRIOR APPLICATION NUMBER: 60/7110,420  
; PRIOR FILING DATE: 1998-11-30  
; NUMBER OF SEQ ID NOS: 1  
; SOFTWARE: Patdntln Ver. 2.1  
; SEQ ID NO 1  
; LENGTH: 2101  
; TYPE: PRT  
; ORGANISM: Homo sapiens  
; US-09-452-294-1
